Maps Instead: screenshot checklist

Part A feeds the website (exact file names matter). Part B is for the App Store listing. Part C is the App Preview video.

Before you start

- Light mode on every device. Portrait on iPhone and iPad.
- Make sure the extension is **on** and allowed on Google sites before the "working" shots, and **off** for the Settings shots where you want the switch visibly being turned on.
- iPhone screenshot: Side button + Volume Up. Mac window: Shift-Command-4, then Space, click the window. Mac full screen recording: Shift-Command-5.
- Annotate afterwards in Preview: Tools › Annotate › Rectangle, red, border 4. One red rounded box around the thing to tap.
- AirDrop phone shots to the Mac, rename to the file names below, put them in `docs/images/`.

Part A: website pictures (14)

	FILE NAME	DEVICE	WHAT IS ON SCREEN	RED BOX AROUND
☐	`ios-settings-apps.png`	iPhone	Settings main list, scrolled to show Apps	Apps
☐	`ios-settings-safari.png`	iPhone	Settings › Apps › Safari, scrolled so Extensions is visible	Extensions
☐	`ios-settings-extensions.png`	iPhone	The Extensions list	Maps Instead
☐	`ios-settings-remapped.png`	iPhone	Maps Instead's page: Allow Extension on, Permissions list with Google sites set to Allow (name is historical; keep it)	Allow Extension switch
☐	`ios-safari-prompt.png`	iPhone	Safari's "Maps Instead would like to access google.com" prompt. To trigger it, set google.com back to Ask in Settings, then open google.com	Always Allow
☐	`ios-test.png`	iPhone	Apple Maps showing directions to Apple Park, right after pressing Test it	none
☐	`mac-safari-settings.png`	Mac	Safari › Settings › Extensions with Maps Instead ticked	the tick box

☐	`mac-permissions.png`	Mac	Same window, the Edit Websites… sheet or the Always Allow on Every Website button	Always Allow on Every Website
☐	`mac-test.png`	Mac	Maps app showing directions to Apple Park	none
☐	`app-main.png`	Mac (or iPhone)	Maps Instead app main screen, status card showing On	none
☐	`popup.png`	Mac (or iPhone)	Safari toolbar popup: toggle on, redirect count above zero	none
☐	`hero.jpg`	iPhone	Apple Maps with a route drawn, arrived from a Google link. Used if there is no video	none
☐	`hero.mp4`	iPhone	Screen recording, 15 to 30 s: Google result › tap Directions › Apple Maps opens. Same cut as Part C	none
☐	`hero-poster.jpg`	iPhone	Optional. The Apple Maps frame from the video, used as the video's poster	none

Part B: App Store screenshots

Take each shot on an iPhone 16 or 17 Pro Max (6.9"), a 13" iPad Pro, and the Mac. No annotations; captions are added later in a design tool or left off.

	#	WHAT IS ON SCREEN	CAPTION TO PAIR WITH IT
☐	1	Apple Maps with directions drawn, arrived from a Google link	Directions actually work
☐	2	Google search result card in Safari with the Directions button visible	Tap Directions in Safari
☐	3	Messages thread containing a Google Maps short link	Shared links open in Apple Maps
☐	4	Maps Instead app main screen, status On	Set up in a minute
☐	5	Safari popup with the toggle and a count	Pause any time
☐	6	(graphic, no capture) iPhone, iPad and Mac side by side	Buy once. All three.
☐	7	(graphic, no capture) lock icon, "No tracking, no data, open source"	Privacy you can check
☐	8	Mac only: Safari Extensions settings with Maps Instead ticked	Lives in Safari

Required sizes: iPhone 6.9" 1320 × 2868, iPad 13" 2064 × 2752, Mac 2880 × 1800 (16:10). Simulator screenshots are fine for iPhone and iPad shots 2, 4 and 5.

Part C: App Preview video (iPhone, 22 seconds)

	TIME	ON SCREEN	OVERLAY CAPTION (OPTIONAL)
☐	0 to 3 s	Safari, Google search for a restaurant, local card visible	A Google result
☐	3 to 6 s	Tap Directions on the card	Tap Directions
☐	6 to 10 s	Apple Maps opens with the route drawn	Apple Maps. Every time.
☐	10 to 14 s	Messages, a shared maps.app.goo.gl link, tap it	Shared links too
☐	14 to 18 s	Apple Maps opens on the place	No app store detour
☐	18 to 22 s	Maps Instead app main screen, status On	Set up in a minute

- Record with the iPhone's built-in screen recorder (Control Centre), trim in Photos or QuickTime, export at native size.
- No hands, no device frame, portrait. Set the poster frame to the Apple Maps directions frame.
- Repeat on the Mac in landscape for the macOS preview, ending on Safari's Extensions settings.
